

CRICKSTATS

1. INTRODUCTION

Project Overview

CRICKSTATS is a Salesforce-based application designed to track, manage, and analyze cricket players' performance on a match-by-match basis. The system uses custom objects, relationships, dashboards, and automation tools to provide structured performance insights.

Purpose

- To digitize player performance records
- To improve accuracy and accessibility of cricket statistics
- To provide real-time analytics
- To support player development and team planning
- To automate data management using Salesforce

User Story

As a Salesforce Admin, I want to create a comprehensive player performance tracking application within Salesforce to capture and analyze detailed match-by-match information of cricket players. The application includes custom objects such as Player and Match Performance with defined fields and relationships.
